

DESIGNED AND DEVELOPED BY TQS, Qnet is a web-based application built to improve communication between TQS Liaisons and the clients they represent.

DRILL DOWN INTO QUALITY ISSUES BY:

- Plant Location
- Issue Type
- Corporate Division
- Trends Over Time

THE QNET ADVANTAGE

REAL-TIME INFORMATION

As issues arise, get alerts with data and photos sent immediately to your computer or smart phone.

CRITICAL INFORMATION DISTRIBUTION

Information is shared automatically among other liaisons and designated members of your team to quickly assess their situation and prevent further issues at other plants or service locations.

QUALITY ISSUE DASHBOARDS

Powerful data mining capabilities through online, interactive report applications for trending and prioritizing issues by plant location, issue type or corporate division.
